SUMMARY

Bachelor of Computer Science student at UTS majoring in Interaction Design, with practical experience in full-stack development, software engineering, and collaborative projects. Strong collaborator with hands-on experience in team projects and personal initiatives. Seeking opportunities in software engineering, web development, and cloud-based applications.

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS, Python, Java, Processing, SQL, C#.
Frameworks: ReactJS, Tailwind, NodeJS.
Other: Unity, Arduino, Azure, Git, GitHub, Problem-solving, Team Collaboration, Microsoft Teams.

EXPERIENCE

Eggsterant **May 2025 – Aug 2025**
Frontend Developer Intern *Sydney, Australia*

- Supported frontend development using modern web technologies, ensuring clean, maintainable code.
- Collaborated with stakeholders to define and deliver UI features.
- Prepared and submitted pull requests with detailed documentation.

PROJECTS

Spoti-List (Spotify Tracking Web Application) **June 2025 - July 2025**
Personal Project

- Developed a dynamic web application integrating with the Spotify API to display real-time data, including currently playing tracks and the user's top 10 most-played songs.
- Designed and implemented frontend with ReactJS and Tailwind CSS and backend services with Node.js.
- Deployed on Microsoft Azure for global availability and reliable hosting.

Car Rental Website **Apr 2025 - May 2025**
Personal Project

- Created a full-stack vehicle rental system allowing users to browse, search, and book available cars.
- Developed checkout and order confirmation workflows using PHP, MySQL, and JavaScript.

Online Grocery Store **Mar 2025 - Apr 2025**
Personal Project

- Designed a full-stack e-commerce grocery platform with product filtering, shopping cart, and checkout functionality.
- Developed backend using PHP and MySQL and implemented frontend with JavaScript and XAMPP for local testing.

Shinobi Showdown (Pac-Man Inspired Unity Game) **Sep 2023 – Nov 2023**
Personal Project

- Developed a maze-based action game in Unity using C#, featuring grid-based player movement and collision handling.
- Designed a UI system including a start menu, HUD (score, lives, timer) and persistent high score saving.

EDUCATION

University of Technology Sydney **Feb 2023 – Dec 2026**
Bachelor of Computer Science (Honours) - Major (Interaction Design)
Relevant Coursework: JavaScript, HTML, CSS, PHP, Java, ReactJS, Python, C, C#, DSA, Processing, C++, Arduino, Unity, Git, GitHub, .NET.

Self-Taught (Online/Hands-on learning) **Jul 2022 – Present**
JavaScript, ReactJS, Python, HTML, CSS, Azure.

UTS College **Mar 2022 – Dec 2022**
Diploma of Information Technology
Relevant Coursework: Java, SQL, HTML, CSS, Python.
