

Zi Yang (Daniel) Liu

Sydney, NSW, Australia | ziyangliu2.work@gmail.com | +61 469 898 589 | [GitHub](#) | [LinkedIn](#)

Summary

Final-year Computer Science student and web developer with hands-on experience building full-stack applications, interactive dashboards and optimized web platforms. Passionate about engineering high performance frontend interfaces and robust API integrations.

Education

- University of Technology Sydney | Bachelor of Computer Science (Honours)** **Feb 2023 – Dec 2026**
- Relevant coursework: React, JavaScript, TypeScript, Next.js, PHP, .NET, SQL, Data Structures & Algorithms
- UTS College | Diploma of Information Technology** **Mar 2022 – Dec 2022**
- Relevant coursework: Java, Python, HTML/CSS, SQL

Projects

- Music Streaming Analytics Dashboard** **Apr 2026 – Jun 2026**
- Integrated Spotify Web API to process listening analytics into interactive, responsive data dashboards.
 - Implemented OAuth 2.0 authentication and API routing using Vercel Serverless Functions.
 - Deployed globally on Vercel utilising edge CDN caching and automatic SSL for optimised load times.
 - Managed project codebase version control dynamically via Git and GitHub.
 - Technologies used: React, TypeScript, Node.js, Spotify API, OAuth 2.0, CI/CD, Vercel, Git, GitHub
- Cryptocurrency Wallet App** **Apr 2026 – Jun 2026**
- Nominated for Software Engineering Showcase at UTS Tech Fest 2026 for outstanding full-stack architecture.
 - Engineered a dedicated full stack web platform to manage showcase booth logistics and live demonstrations.
 - Developed secure RESTful API endpoints in ASP.NET for client account operations and authentication.
 - Configured custom domain architecture with Cloudflare DNS, edge SSL and back-end integration.
 - Technologies used: ASP.NET (C#), Swift, CI/CD, Docker, PostgreSQL, Scalar, Git, GitHub
- Educational Matching Platform (Capstone)** **Aug 2025 – Dec 2025**
- Conducted market competitor analysis, UX research and user interviews to define target public incentives and product feature roadmap.
 - Designed sequential low, mid and high-fidelity project prototypes in Figma prior to production.
 - Developed three core product modules, including dynamic matching maps, within a five-person team.
 - Translated high-fidelity mockups into a responsive, highly optimised React and Tailwind CSS front-end.
 - Automated testing and cloud deployment by configuring a robust CI/CD pipeline to Microsoft Azure.
 - Technologies used: Figma, React, Tailwind CSS, ASP.NET (C#), Azure, PostgreSQL, CI/CD, Git, GitHub
- Full-Stack Car Web Application** **Apr 2025 – May 2025**
- Developed a complete vehicle rental platform featuring dynamic browse, search, booking and checkout flows.
 - Engineered responsive front-end interfaces with secure form handling to render database-driven content.
 - Technologies used: PHP, MySQL, JavaScript, HTML/CSS.
- Full-Stack E-Commerce Platform** **Mar 2025 – Apr 2025**
- Built an e-commerce grocery application featuring product filtering, shopping cart and checkout processing.
 - Developed a dynamic JavaScript front-end backed by a structured PHP and MySQL architecture.
 - Technologies used: PHP, MySQL, JavaScript, HTML/CSS.

Technical Skills

- Languages:** JavaScript, TypeScript, PHP, Python, Java, C#, C, C++, Swift, SQL,
- Frameworks & Libraries:** React, Tailwind CSS, Node.js, ASP.NET (C#), Next.js
- Hosting & Tools:** Vercel, Microsoft Azure, Cloudflare (DNS, SSL, CDN, caching), Docker, CI/CD, Git, GitHub.
- Design & AI-Assisted:** Figma, DaVinci Resolve, Adobe Premiere Pro, ChatGPT, Claude Code, Cursor, Gemini.
