SUMMARY

I am a Bachelor of Computer Science student at UTS majoring in Interaction Design, with practical experience in full-stack development, software engineering, and collaborative projects. Strong collaborator with hands-on experience in team projects and personal initiatives. Seeking opportunities in software engineering, web development, and cloud-based applications.

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS, Typescript, Python, Java, SQL, C#.

Frameworks: ReactJS, Tailwind, NodeJS.

Other: Unity, Arduino, Azure, Git, GitHub, Problem-solving, Team Collaboration, Microsoft Teams.

PROJECTS

Spoti-List (Spotify Tracking Web Application)

Jun 2025 - Present

Personal Project

- Engineered a dynamic web application integrating with the Spotify API to display real-time data, including currently playing tracks and user's top 10 most-played songs.
- Designed and implemented frontend with ReactJS and Tailwind CSS and backend services with Node.js.
- Deployed backend services on Vercel for global availability and reliable hosting.

iOS Crypto Tracker (Full-Stack Cryptocurrency App)

Apr 2026 – May 2026

University Project

- Built a full-stack iOS cryptocurrency tracking app with a Swift frontend and a C# (.NET) backend, displaying real-time market prices and watchlist functionality.
- Designed and developed RESTful API endpoints in C# to handle market data requests, with the Swift client consuming them via URLSession to render live cryptocurrency data.
- Collaborated as part of a team using Git and GitHub for version control, integrating frontend and backend services into a working full-stack mobile application.

Bubble Pop (iOS Bubble-Popping Game)

Mar 2026 – Apr 2026

University Project

- Built a casual iOS mini-game in Swift using SwiftUI for navigation and SpriteKit for physics-based bubble interactions and animations.
- Implemented core gameplay including a 60-second timer, color-weighted scoring system, combo multipliers, and customisable settings for game duration and bubble count.
- Engineered a persistent leaderboard with SwiftData and adaptive layouts that scale across iPhone and iPad devices and orientations.

EduMap

Aug 2025 – Nov 2025

University Capstone Project

- Built a high-fidelity MVP prototype with a team of five featuring modules like a pitch video, networking map and buddy matching. Developed responsive UI using React.js and Tailwind CSS.
- Architected RESTful with backend API in ASP.NET Core (C#) with Entity Framework Core migrations against a PostgreSQL database hosted on Supabase, implementing JWT authentication and a GitHub Actions CI/CD pipeline.

UTS CarDeal

Apr 2025 - May 2025

University Project

- Created a full-stack vehicle rental system allowing users to browse, search, and book available cars.
- Integrated checkout and order confirmation workflows using PHP, MySQL, and JavaScript.

Freshify

Mar 2025 - Apr 2025

University Project

- Designed a full-stack e-commerce grocery platform with product filtering, shopping cart, and checkout functionality.
- Deployed backend using PHP and MySQL and implemented frontend with JavaScript and XAMPP for local testing.

EDUCATION

University of Technology Sydney

Feb 2023 – Dec 2026

Bachelor of Computer Science (Honours) - Major (Interaction Design)

Relevant Coursework: JavaScript, HTML, CSS, ReactJS, Java, Python, C, C#, DSA, SQL, Processing, C++, Arduino, .NET, Unity, Git, GitHub, PHP

Self-Taught (Online/Hands-on learning)

Jul 2022 – Present

JavaScript, Typescript, ReactJS, Python, HTML, CSS, Azure, Vercel

UTS College

Mar 2022 – Dec 2022

Diploma of Information Technology

Relevant Coursework: Java, SQL, HTML, CSS, Python.
