SUMMARY

I am a Bachelor of Computer Science student at UTS majoring in Interaction Design, with practical experience in full stack development, software engineering and collaborative projects. Strong collaborator with hands on experience in team projects and personal initiatives. Seeking opportunities in software engineering, web development and cloud-based applications.

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS, Typescript, Python, Java, SQL, C#.

Frameworks: ReactJS, TailwindCSS, NodeJS.

Other: Unity, Arduino, Azure, Git, GitHub, Problem solving, Team Collaboration, Microsoft Teams.

PROJECTS

Soleri

Jun 2025 – May 2026

Personal Project

- Engineered a full stack web application using React.js, TypeScript and Node.js that integrates with the Spotify Web API to deliver deep insights into user's listening habits, including a top genre breakdown pie chart, listening heatmap by hour and day, weekly discovery rate graph and artist obsession detection.
- Implemented OAuth 2.0 authentication and API routing through Vercel Serverless Functions, with a personal preference vs. Billboard Top 100 comparison and longest uninterrupted listening session tracking.
- Deployed the application on Vercel for global availability, utilising GitHub for version control and collaborative project development.

MemeSQL

Apr 2026 – May 2026

University Project

- Developed a full stack iOS cryptocurrency wallet app using SwiftUI and ASP.NET that enables users to create and manage custom coins, including meme coins, with secure authentication and QR code based transfers.
- Implemented transaction tracking and responsive mobile UI components, designing and developing RESTful API endpoints in ASP.NET to handle wallet operations, with the SwiftUI client consuming them via URLSession.
- Collaborated as part of a team using Git and GitHub for version control, integrating frontend and backend services into a working full stack mobile application and produced demo videos using Adobe Premiere Pro and DaVinci Resolve to showcase functionality.

Bubble Pop (iOS Bubble-Popping Game)

Mar 2026 – Apr 2026

University Project

- Built a casual iOS mini-game in Swift using SwiftUI for navigation and SpriteKit for physics-based bubble interactions and animations.
- Implemented core gameplay including a 60-second timer, color-weighted scoring system, combo multipliers and customisable settings for game duration and bubble count.
- Developed a persistent leaderboard with SwiftData and adaptive layouts that scale across iPhone and iPad devices and orientations.

EduMap

Aug 2025 – Dec 2025

University Capstone Project

- Collaborated with a multidisciplinary team of five to design and develop a high-fidelity MVP web platform assisting incoming university students transition into degree life, featuring three modules: a Course Questionnaire matching students with suitable degrees and peers, an Events & Networking Map for campus activities and a Buddy Program connecting first-years with mentors.
- Developed the React.js and Tailwind CSS frontend with a CI/CD pipeline deploying to Azure and architected the ASP.NET Web API backend with Entity Framework Core migrations against a PostgreSQL database (via Supabase), implementing JWT authentication and data persistence.

UTS CarDeal

Apr 2025 - May 2025

University Project

- Created a full-stack vehicle rental system allowing users to browse, search and book available cars.
- Integrated checkout and order confirmation workflows using PHP, MySQL and JavaScript.

Freshify**Mar 2025 - Apr 2025**

University Project

- Designed a full-stack e commerce grocery platform with product filtering, shopping cart and checkout functionality.
- Deployed backend using PHP and MySQL and implemented frontend with JavaScript and XAMPP for local testing.

EDUCATION

University of Technology Sydney**Feb 2023 – Dec 2026**

Bachelor of Computer Science (Honours) - Major (Interaction Design)

Relevant Coursework: JavaScript, HTML, CSS, ReactJS, Java, Python, C, C#, DSA, SQL, Processing, C++, Arduino, .NET, Unity, Git, GitHub, PHP

Self-Taught (Online/Hands-on learning)**Mar 2022 – Present**

JavaScript, Typescript, ReactJS, Python, HTML, CSS, Azure, Vercel

UTS College**Mar 2022 – Dec 2022**

Diploma of Information Technology

Relevant Coursework: Java, SQL, HTML, CSS, Python.
